Cheer

WITH ENJOYABLE INDOOR GARDENS

These cheerful Cactus Plants can be easily arranged in a glass garden (as illustrated), if desired. Good light, very little water, and this colorful little garden is yours to enjoy all the winter months. For window sill plants there is nothing that holds up better than this type plant. Many are quite unique and present an entirely unexpected interest in the window garden. They are excellent planted in either the common clay pots, or in the fancy pottery we like so well.

CT-1 Aloe-Gasteria—A hybrid that combines the pleasing qualities of both plants. Spotted with tiny white dots, it has all the appearance of the graceful aloes. 25c each.

CT-2 Aloe Nobilis—The most popular of the aloes. A handsome green rosette, compact plant, dotted with harmless short spines. 25c each

CT-3 Haworthia, Cymbiformis—A low growing rosette of light green fleshy leaves with translucent streaks on the upper surface, sometimes for this reason known as the "Window Plant." 35c each.

CT-4 Haworthia Coarctata—Dark green pointed leaves forming a dense column shaped rosette. Tiny white bloom, on a long wiry stem. Small growing plant. 25c each.

CT-5 Nyctocereus Serpentinus—A very tall, slender, night flowering, Mexican cactus, densely covered with silver gray spines, reddish at the growing tip. Has three inch white flowers. 25c each.

CT-6 Opuntia Cristata—"Boxing Glove Cactus." When small appearing like to any Opuntia, but as it grows older, it assumes queer and grotesque shapes. 25c each.

CT-7 Euphorbia Caput Medusae—"The Head of Medusa!" One of the Euphorbia you won't want to miss. Even has snakes like to the very locks of the horrible Medusa. 25c each.

CT-8 Opuntia Rufida—A sister to the microdasys, with rounder pads, and reddish brown tufts of spines. 25c each.

CT-9 Opuntia Microdasys—Common name "Bunnies Ear" and that describes it exactly. With soft, downy stickers (which are much more vicious than they seem), it proves a favorite with everyone. 25c each.

CT-10 Coraphantha Desertii—One of those low, bushy cacti. Mexican variety with white spines, and large rose colored flowers. 35c each

CT-11 Chamaecereus Sylvestrii—"Peanut Cactus." Branches out like a tree, from which its Latin name is taken. A small clustered variety with orange scarlet flowers one to one and a half inches in diameter. 25c each.

CT-12 Cereus Peruvianus—Bluish green columnar cactus, four to five sided with spines at the angles. White flowers at night; a large growing variety. 25c each.

CT-13 Neo-Mammillaria Applanta—An attractive cactus, like to a pin-cushion, that has very fine white stickers on its surface. Round, and very low. 25c each.

CT-14 Echinocereus Reichenbrachii—One of the barrel cactus. It reaches a height of five to seven inches in no time. One of the more free flowering varieties. 25c each.

CT-15 Coraphantha Vivipara—One to have your pupils to observe for finding the source of the name. Also one of the low-growing varieties for the terrarium. 25c each.

CT-16 Sempervivum Calcareum—Bluish gray rosette of pointed leaves tipped with reddish purple. One of the handsomest varieties, of the "hen and chickens." 25c each.

CT-17 Stapelia, Variegata—Sometimes called the "Star of Bethlehem." Has a huge flower resembling a star, but with a heavy pungent odor. Excellent for the classroom. 25c each.

Cactus illustrated below:

Back row: CT-1; CT-6; CT-12; CT-8; CT-5; CT-7; CT-17; CT-9; CT-2.
Front row: CT-15; CT-16; CT-10; CT-3; CT-4; CT-11; CT-14; CT-13.

Collections

No. 1—Consisting of five plants, one each Aloe, Haworthia, Euphorbia, Opuntia, and Cereus. 5 plants for only

\$1.00
Prepaid

No. 2—Consisting of ten plants, two each of the above named species of plants. 10 plants for only

\$1.75
Prepaid

No. 3—Consisting of one each as illustrated in picture on left and above in terrarium form. Seventeen plants, all different. 17 plants for only

\$2.75
Prepaid

PLEASURE ALL THE WINTER— MANY WEARY HOURS TURNED TO JOY

Decorative Plants as described above—
Back row: CT-12; CT-11; CT-8; CT-2; CT-9; CT-10; CT-17; CT-1; CT-5; Middle row: CT-4; CT-14; CT-6;
Front row: CT-3; CT-15; CT-13; CT-16; CT-17.

For an attractive terrarium garden, any glass receptacle will do, if large enough to accommodate your plants. Soils can be ordered, with a collection of plants, thus adding greatly to your convenience.

Generally terraria do best in a light place however, avoid hot sunshine. Humidity is controlled by the use of the glass covering which can be removed if too much moisture is evident. Remove any leaves that are yellow, as this will result in decay, and rotting of plants in the

garden. Prevent the formation of molds, by allowing to dry out a bit if they begin to appear, be sure to remove any that form at once.

Watch carefully for any evidences of sow bugs. These little fellows are the most destructive of the terrarium pests. A little sulphur will help to make the terrarium an unhealthy place for them. Try a half of a potato, and when these insects gather under it, remove them, and kill them.

Suggestions for Soil Mixtures—
Bog Soil—Mixture of sand and sphagnum moss. 4:1 volume
Desert Soil—Mixture of sand and garden soil. 2:1 volume
Woodland Soil—Mixture of leaf mold and peat moss. 4:1 volume
Decorative Soil—Mixture of leaf mold and peat moss. 3:1 volume.
The addition of a little fresh soil at intervals will prove beneficial for the plants. Watch water supply carefully.

Ferns, described above, from left to right: FT-1, FT-5, FT-6, FT-4, FT-7, FT-3, FT-2, FT-8.

FERNS (FT Series of Plants)

FT-1 *Pteris serrulata cristata variegata*.

Outstanding for its coloring, it is variegated green and white. Grows about 12 to 15 inches in height. Just the thing for variation in the terrarium. 25c each

FT-2

Onychium Japonicum. Another of the ferns with the large fronds. Sometimes they are said to resemble palms.

25c each

FT-3

Pteris Parkerii. Fine leafy fronds, grows to a height of about 12 inches or more. Best for background planting.

25c each

FT-4

Pteris serrulata cristata compacta.

25c each

FT-5

Cyrtomium Rochfordianum. Heavy leafed, leaves also are very dark, shiny green. About 12 inches in height. One of the best for terraria purposes.

25c each

FT-6

Pteris serrulata cristata.

25c each

FT-7

Pteris Rivertoniana. One of the ferns that make us like this phyllum best. Fine, yet, not the delicate thread-like branches of some of the varieties. Makes a wonderful appearance in the terrarium, or out of it. 25c each

FT-8

Pteris Wilsonii. One of the low

25c each

FT-9

Pteris serrulata cristata variegata.

25c each

FT-10

Selaginella, Blue-Green. An interesting plant. Its foliage is of a changeable blue to green. Beautiful for even a pot plant. 50c each

FT-11

Selaginella, (Moss Fern). One of the "Must-Have" ferns. Everyone likes it. Be sure to have one of these. 25c each

FT-12

Fittonia, white veined—These plants are excellent for terrarium use, with their variegated leaves. Splendid means to study the structure of the leaf, as the veins are distinctly marked. 35c each

FT-13

Fittonia, pink veined—Same as above, but with pink. You'll like this one for variation. 35c each

FT-14

Irish Moss (Helsine)—You'll remember the little "baby tears". Well, this is it. In its attractive mossy way, this little plant has stolen the heart of many a biology class. 25c each

FT-15

Epica (Brazilian Coleus)—One of the outstanding plants for the use in the decorative terrarium. Its leaves are variegated, red and green, covered with soft downy velvet. Has brilliant carmine flowers. You'll want to try one of these. 50c each

FT-16

Cryptanthus, Star—An entirely different plant. Its leaves are variegated, red and green, and its spreading sword-leaves present a decidedly unusual appearance. 35c each

FT-17

Cryptanthus, Green—The same outspreading palms, but in a beautiful green. One of the most pleasing of the Decorative plants. 25c each

FT-18

Peperomia, Watermelon Leaf—An interesting little plant with its attractive variegated leaves that resemble the covering on a watermelon. Recommended for the terrarium. 25c each

FT-19

Tradescantia Dracaenifolia—Related to the common "Wandering Jew," but you should see this aristocratic cousin! Interesting to compare the two, in the classroom, when they are such near relatives. 35c each

FT-20

Ivy—The cutest little dwarf formation of plants imaginable

FT-21

Fittonia, pink veined—Same as above, but with pink. You'll like this one for variation. 35c each

FT-22

Heart Leaf Ivy—(Hedera cordata)

25c each

FT-23

Leopard Ivy—(Hedera cordata variegata)

25c each

FT-24

Self-Branching Ivy—(Hedera cordata)

25c each

FT-25

Grape Ivy—(Hedera helix)

25c each

FT-26

Variegated Ivy—(Hedera helix variegata)

25c each

FT-27

English Ivy—(Hedera helix)

25c each

FT-28

Decorative Plants (DT Series of Plants)

DT-1

Epica (Brazilian Coleus)—One of the outstanding plants for the use in the decorative terrarium. Its leaves are variegated, red and green, covered with soft downy velvet. Has brilliant carmine flowers. You'll want to try one of these. 50c each

DT-2

Cryptanthus, Star—An entirely different plant. Its leaves are variegated, red and green, and its spreading sword-leaves present a decidedly unusual appearance. 35c each

DT-3

Peperomia, Watermelon Leaf—An interesting little plant with its attractive variegated leaves that resemble the covering on a watermelon. Recommended for the terrarium. 25c each

DT-4

Tradescantia Dracaenifolia—Related to the common "Wandering Jew," but you should see this aristocratic cousin! Interesting to compare the two, in the classroom, when they are such near relatives. 35c each

DT-5

Epica (Brazilian Coleus)—One of the outstanding plants for the use in the decorative terrarium. Its leaves are variegated, red and green, covered with soft downy velvet. Has brilliant carmine flowers. You'll want to try one of these. 50c each

25-lb. bag	60c

ENJOY NATURAL BEAUTY with these AQUATIC PLANTS

All the beauty of Nature is herein listed. The aquarium is certainly the complete study of all the beautiful things of life. Here is the quiet passiveness that is so restful for the human mind after its seance of probing, experimenting, and labor. Here is life—in the miniature degree, to be sure—but in a wonderfully philosophical way. Just the

coloring that is needed for the toning up of our own thoughts.

Too, the aquarium Garden is one of the most attractive of additions to the living room, or the dining room. It is an outstandingly different type of furniture, and beautifully takes its place with any scheme of design.

PRICES

Anacharis
Cabomba
Ludwigia

Green Myrio
Red Myrio
Dwarf Anacharis

The above plants are bunched and can be gently anchored in the sand or gravel in your aquarium. 15c per bunch, 2 for 25c.

Vallisneria, Varigated, Rubra, and Corkscrew varieties, 10c per plant, 5 for 35c.

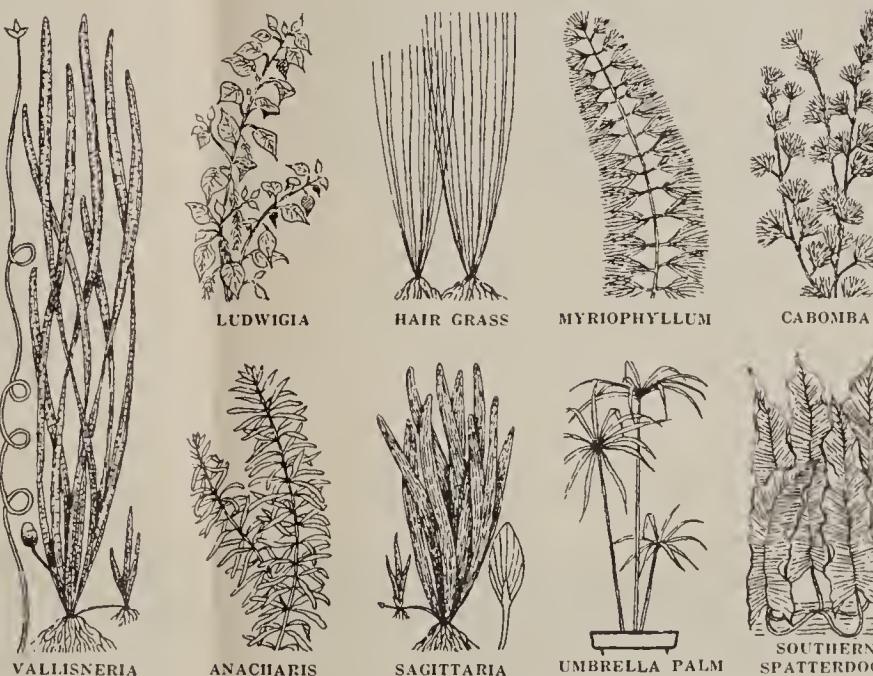

Spatterdock (Southern)
Cryptocoryne Willisii
Underwater Fern
Four Leaf Clover
Hair Grass

These plants have roots and should be planted in the aquarium. 15c per plant, 2 for 25c.

Spatterdock (Tropical)
Banana Plants
Sag. Guayanensis
Green Water Rose

Vallisneria, Italian, beautiful plants. 3 for 10c; 35 per doz.
Saggittaria, dwarf and large varieties, 10c each, 4 for 25c.

Plants are the most important part of the aquarium equipment. They keep the water constantly in condition, because they release oxygen and on the other hand take up the carbon dioxide given off by the fishes. Plants also serve as a natural refuge from too much sunlight.

IF I WERE A DOCTOR,

or any other professional man, who, for hours, has to examine, interview, converse, advise, or suggest, I certainly would try to have the "Party of the Second Part" in such a frame of mind that when his time came to face me, it would be quite a pleasant experience for both of us. I believe that after hours of this contact, I, myself, would be in an irritable frame of mind, too. (I remember how I have felt sitting "on the

other side" of the door, and waiting for an interview.) Magazines hold no interest, looking and studying the others in the room is taboo, and certainly has no soothing effect. Regardless of how artistically the room is arranged, it still is another "Waiting Room".

Anything pertaining to water, anything pertaining to plant life, in this waiting room, would help to convert it to a room in which there is something of interest to all. Hours can be spent in quietly beholding the beauties of Nature.

A LARGE COLLECTION OF ASSORTED AQUARIUM PLANTS

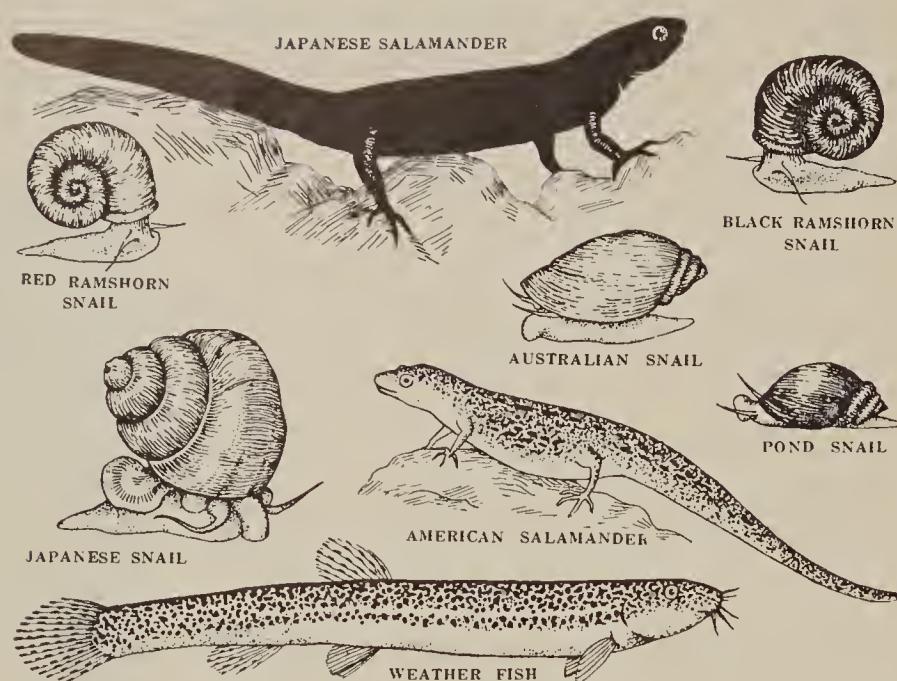

Collection No. P-5

20 assorted plants of all the popular varieties, sufficient to balance a 10 to 15 gallon aquarium.

Postpaid

\$1.00

Results in dependable constant temperature. Built-in thermometer, 40 watt size for 5 to 10 gallon aquarium. 75 watt for 10 to 25 gallon aquarium. \$2.50 each, postpaid.

JO SELECTS —

For years we have been devoting much time to growing and testing plants for Indoor Gardening in all its phases—Glass Gardens, Window Gardens, Dish Gardens, Bog Gardens.

Friends and customers visiting our gardens have expressed the wish for us to catalog these different and attractive plants, so that they might too enjoy the plants we have been here enjoying.

This circular on "Indoor Gardening" is the result of these requests. Only the best of the hundreds of plants we have tried out are listed. Many of them cannot be secured anywhere else.

THINGS AQUATIC in the INDOORS

Aquatic life has untold values in the indoors and be it in the Home or in the Office, in the sickroom, the unusual amount of pleasure derived from an aquarium offsets what little effort must be made for the upkeep. Little difficulty is had in maintaining an Aquatic Garden once it is established.

THINGS HORTICULTURAL in the INDOORS

Glass gardening, Window Sill Gardening, Dish Gardening—all present a fascinating yet very inexpensive way to add extra beauty and cheerfulness to your home.

IN INDOOR GARDENING

So much can be accomplished in such small expenditures that it can be readily seen why everyone today is trying the various phases of gardening for the beautification of their home.

Please Read.
